

Navod na stranku a do helpu v software (help/controls):

- Download the .zip files of poses which you would like to Use. Remember the location you save the .zip files to.
- Create a New Folder and rename it according to the .zip file. Example: dog.zip rename New Folder to dog
- Use a zip extraction program and extract all files from the downloaded zip file to the newly created and renamed folder. A great freeware alternative to winzip is 7zip which can be downloaded at www.7zip.com
- Launch the Pose Viewer 1.0 Program.
- To load poses click File and then Open. Locate the folder you extracted the poses to and click on an .xml file, then click Open

- Once the first pose is displayed you can use the buttons or shortcut keys as follows:

>Sem pojde obrazok konkretno buttonu<

Use the Next buttons to display the next poses from the pose folder. (You can also use Page Up and Page Down as a keyboard shortcut.)

>Sem pojde obrazok konkretno buttonu<
